PA CLE: 2.0 credits
CA CLE: 2.0 credits
NJ CLE: 2.4 credits
presumptively approved

Overview

The DC-Baltimore-NoVa region construction industry is booming in every market sector, including retail, residential, office and industrial. For some of these projects, success will ultimately turn on how well parties have allocated and managed the risk. Despite the importance and cost of the insurance and indemnification agreements that underlie construction projects, even sophisticated businesses sometimes learn—only when it is too late—that their agreements are not tailored to their needs. We will cover these front-burner insurance issues for the region's construction industry. Our discussion will include a review of practical contracting perspectives, construction insurance fundamentals, recent insurance disputes in the industry, and insurance associated with cutting-edge construction technology.
